Federal meat inspection was established by the Meat Inspection Act approved June 30, 1906. It is now administered by the U.S. Department of Agriculture's Consumer and Marketing Service. General responsibility for the program within C&MS rests with the Deputy Administrator for Consumer Protection.

The Meat Inspection Act required that all meat processed by plants which sell any of their products across State lines be under Federal inspection. Through this inspection, consumers are assured of a wholesome, sanitary, unadulterated and truthfully labeled meat supply.

By the end of the fiscal year on June 30, 1967, Federal meat inspection was being conducted in 1,973 establishments located in 822 cities and towns. Of this number, 1,365 were engaged in meat processing only. This compares with 1,931 establishments in 785 cities and towns for fiscal year 1966.

Ante Mortem Inspection-A total of 112,910,691 animals were examined on ante mortem inspection, of which 112,731,912 were passed for slaughter.

Post Mortem Inspection-A total of 112,896,166 carcasses were inspected after slaughter, of which 112,639,391 were passed for food.

Federal meat inspectors assured the wholesomeness of 70.2 billion pounds of meat in fiscal 1967. This figure represents the total number of "inspection pounds;" other words, the meat may have been counted at various inspection points.

On Dec. 15, 1967, President Johnson signed the Wholesome Meat Act of 1967 to assure consumers that all meat in the U.S. is produced under sanitary conditions. This will be done by either the Federal government or an adequate State system.

The Wholesome Meat Act gives the States two years to set up an adequate inspection program. If they do not act within that time, the Federal government may provide the inspection duties in that State.

The Act principally affected the following persons immediately:

- *Those who prepare carcasses of cattle, sheep, swine, goats, or horses into wholesale cuts or smaller pieces for distribution in interstate or foreign commerce (known in the meat industry as boners and cutters);

- *Persons engaged in slaughtering or meat product preparation in the District of Columbia or any unorganized territory of the U.S., and

- *Retail butchers and retail dealers holding certificates of exemption from Federal meat inspection.

1/ "Suspected" is used to designate animals suspected of being affected with diseases or conditions that may cause condemnation in whole or part on special post-mortem inspection.

2/ For causes and additional condemnation, see Tables 2 to 6, inclusive.

3/ Horses are slaughtered and their meat handled and prepared in establishments separate and apart from those in which cattle, calves, sheep, goats, and swine are slaughtered and their meat handled and prepared.

4/ Includes 2,321 previously suspected animals that died in pens.
